detected pressure over at least a substantial portion of the
sail surface on a display.

36. The method of Claim 35, wherein providing the
array of pressure sensing pixel capacitors comprises applying
the array of pressure sensing pixel capacitors on both faces
of the sail; and wherein producing real time distribution maps
comprises producing distribution maps of differential pressure
on the windward and on the leeward face of the sail.

REMARKS

It is believed that all of the claims are
patentable over the prior art.

For better readability and the Examiner's
convenience, the newly submitted claims differ from the
translated counterpart claims which are being canceled. The
newly submitted claims do not represent changes or amendments
that narrow the claim scope for any reason related to the
statutory requirements for patentability.

Accordingly, after the Examiner completes a
thorough examination, a Notice of Allowance is respectfully
requested in due course. If any minor informalities need to
